King County Ordinances and Resolutions Related to Solid Waste

From King County Draft Solid Waste Management Plan:

Ordinance Number	General Ordinance Description
7708, 8891	Primary ordinances that established system for disposal of solid waste generated disposed in King County (King County Code 10.04, 10.08,
13622,13550...8108	Establishes hours of operation and types of waste accepted, and various updates to original
6862, 14199	Established SWAC and further makes adjustments to SWAC membership, operations, etc.
7786	Develops waste reduction and recycling programs, work plan to reach goals
9240	Develops Recycled content procurement policy to promote market development of recycled products by establishing preferential purchase programs
9228, 10942	Established minimum levels of service, reporting and education requirements for haulers, etc
14236	Provide direction for operation and development of solid waste system, its capital improvement program as developed in 2001 CSWMP
10916, 11885	Policy to develop alternatives for CDL disposal in response to closure of remaining private CDL disposal facilities.
Resolution Number	General Resolution Description
03-06	Rules & Regulations (Board of Health Solid Waste Regulations
Title 10	The Code of the King County Board of Health (incl. text of WAC 173-350)

General Notes for WUTC table on previous page

- The above solid waste carrier information is portrayed **for WUTC regulated solid waste carriers only.**
- Categories of solid waste customers defined by the WUTC include: single family residential, multi-family residential and commercial. **Multi-family rates are not depicted here.**
- Categories of commercial solid waste collection service as defined by the WUTC include: "Container Service - Non-Compacted - Company-owned container"; "Container Service - Non-Compacted - Customer-owned container"; "Container Service - Compacted - Company-owned container"; "Container Service - Compacted - Customer-owned container"; "Drop Box Service - Non-Compacted - Company-owned drop box"; "Drop Box Service - Non-Compacted - Customer-owned drop box"; "Drop Box Service - Compacted - Company-owned drop box"; "Drop Box Service - Compacted - Customer-owned drop box". **The only Commercial rates provided here are: "Container Service - Non-Compacted - Company-owned container".**
- According to statute, Washington State cities have the authority to contract for solid waste hauling services and associated billing, or to provide their own municipal collection service. Counties have not been granted this option by the legislature. However, statute does direct the WUTC to require regulated solid waste collection companies to comply with the service levels set in the local solid waste management plan. The WUTC defines the service area and monetary collection rates for private firms that service all county residents, as well as for private firms that service those municipalities which do not provide garbage collection service or contract for such service.
- **Of the 280 cities in Washington, 187 take advantage of their option to contract for service or provide their own service. Consequently, the WUTC regulates the solid waste haulers that service approximately 49% of the state's population.** (This includes 40% of the state's population that resides in unincorporated areas, and 9% of the state's population that resides in incorporated areas.)
- Currently, there appears to be no complete tabulation of solid waste collection rates charged to residents of Washington State municipalities is available, and thus there is incomplete knowledge of the direct economic impacts of solid waste disposal on approximately 51% of the state's population.
- [A Certificate \(or "G-permit\) means the certificate of public convenience and necessity issued by the Washington Utilities and Transportation Commission](#) under the provisions of chapter 81.77 RCW for the operation of solid waste collection companies.
- A tariff names rates for the collection, transportation, and disposal of solid waste, and if noted, recycling and yard waste (a document outlining rates, terms and conditions for providing service.) While the G-permit provides an overall legal description of the geographical area in which a carrier is allowed to operate, a tariff defines rates for services and service areas within the geographical area defined in the G-permit. Further, tariffs define the rates a permitted solid waste carrier charges to its residential, multifamily and commercial customers

Community Litter Cleanup (CLCP) 2002-2003 Grant Cycle: Funding Applied by Task (\$)					Litter Education Efforts, King County, 2002			
Recipients	Task: Litter & Illegal Dumps	Task: Education	Task: Tools & Trucks	Total Contract Amount	King County designs and installs signs with anti-litter and illegal dumping messages after cleaning up chronic dumpsites. They also plan to design and distribute fliers and posters targeting homeowners who hire contractors for remodeling projects in order to encourage them to obtain receipts for CDL disposal (a significant portion of illegal dump material). These will be distributed to solid waste customers, cities, and affected county agencies.			
King Co Solid Waste	74,595	—	—	74,595				
Seattle Public Utilities	81,820	—	25,420	107,240				

Litter Crew Organization, King County, 2002

King County contracts with the State Department of Corrections and Friends of the Trail (public lands and waterways) to clean up litter and illegal dumps. King County Department of Parks and Recreation, Maintenance & Facilities Division provide volunteers and/or staff and vehicles to load and transport garbage/recyclables. King County requires Site Information Forms to be completed and typically will not clean areas delegated to other organizations for cleanup. King County advertises to cities and Unincorporated Area Councils that litter and illegal dumpsite cleanup services are available.

- 1) Data used here are gathered from individual facilities and consolidated into a main database from which this spreadsheet is derived. Referral to the actual report forms is suggested in order to resolve questions or before drawing conclusions.
- 2) Facilities which show zero production are for year 2002 only. Production amounts can vary by large amounts from year to year depending on lagoon cleanout operations, etc.
- 3) For the categories related to TRANSPORT TO and RECEIVED FROM, tonnage sums are totaled and reported in parentheses if the sums are different from that reported by the facility. Reasons for discrepancies are varied and need to be investigated on an individual basis if needed.
- 4) The term "ctd." means that the data for the facility is continued in another column where extra lines were used so that additional data could be included.
- 5) WWTP = Waste Water Treatment Plant; STP = Sewage Treatment Plant; BS = Biosolids; LSP = Lime Stabilization Plant; POTW = Publicly Owned Treatment Works.

King County Solid Waste Priorities and Needs for the Near Future:

Public Works:

- 1) Environmental protection through proper landfill management.
- 2) Waste Reduction & Recycling.
- 3) Sustainability.

Jurisdictional Health Department:

- 1) WAC 350 implementation.
- 2) Policy development.
- 3) Support for corrective measures.

King County's Projected Solid Waste Income and Spending, 1999 (as compiled by Jeff Kelly-Clarke, Director, Snohomish County Public Works)

Spending

Total Spending	Waste Handling*	LF Monitoring	Waste Reduction and Recycling	Moderate Risk Waste	Planning	Adminis-tration	Debt Service	Other	Capital Facilities/ Closure	To Fund Balance	Operating Budget
\$101,399,000	\$39,846,000	\$5,373,000	\$6,651,000	\$3,343,000	\$2,097,000	\$14,565,000	\$6,349,000	\$697,000	\$22,478,000	\$0	\$78,921,000

* "Waste Handling" includes transfer operations

Income

Total Revenue	Fees from Disposal	Other service fees	Dist./city fees	Grants	Interest	Fund Balance	Other
\$101,399,000	\$73,642,000	\$775,000	\$260,000	\$1,336,000	\$3,779,000	\$17,777,000	\$3,830,000

Note: * King and Pierce County populations do NOT include Seattle and Tacoma, which have separate solid waste systems.
